

Fox Clinical Services

Autism Support

Are you an autistic adult seeking a space to connect with others who understand your experiences? Our supportive community welcomes you!

This group is geared toward female-identifying individuals in their 30s or 40s with level 1, “mild” and high-masking autism. You do not need to be formally diagnosed, but if you have not received a formal diagnosis, please schedule a meeting with Dr. Taylor Levitt. If you do not meet the age/gender criteria but would be interested in a group like this, please reach out, as more groups could be created.

This group will meet on Thursdays at 5:00 p.m. once or twice monthly. The meeting day/time can be adjusted based on interest and availability. Please get in touch with Dr. Levitt if you are interested in participating or have any questions.
